EXPERIENCE

MASTERCARD TECHNOLOGY PVT. LTD. | Senior Software Engineer

June 2024 – Present | Pune, India

- Spearheaded the design and development of a **highly scalable, fault-tolerant distributed system** within the **global payments ecosystem**.
- Engineered critical modules for “inControl”—a **high-throughput application** supporting **290+ TPS** and **millions of users**—ensuring peak reliability and zero downtime.
- Identified and mitigated key **performance bottlenecks**; streamlined thread pools, and DB queries—achieving a **90%+ reduction in transaction failures**.
- Led **modernization** of legacy monoliths to a robust **cloud-native architecture** using **60+ microservices**, resulting in enhanced elasticity and maintainability.
- **Automated GDPR compliance workflows** using microservices and secure CI/CD pipelines, ensuring **100% adherence to data privacy regulations**.
- **Mentored and led** a high-performing **Agile team of 5 engineers**; facilitated **sprint planning**, backlog grooming, and architectural reviews.
- Built **Dynatrace-based observability dashboards** and real-time alerting, reducing **incident response time by 40%**.

HSBC SOFTWARE DEVELOPMENT INDIA | DEVELOPMENT CONSULTANT SPECIALIST

August 2021 – June 2024 | Pune, India

- Created and maintained enterprise-grade applications across **400+ microservices** in the **Investment Banking domain**, aligned with **CI/CD best practices**.
- Collaborated with cross-functional teams across **8 global locations** to implement **DevOps pipelines, container orchestration, and Infrastructure as Code (IaC)**, reducing deployment time by **40%**.
- Integrated **Grafana, InfluxDB, and Spring Boot Actuator** for **real-time monitoring and telemetry**, enhancing system observability.

BLUECONCH TECHNOLOGIES – A UST COMPANY | SENIOR SOFTWARE ENGINEER

July 2019 – August 2021 | Pune, India

- **Automated supply chain workflows** (OMS, WMS, inventory), achieving **100% automation** in order picking and shipping.
- Boosted system performance by **58%** through API optimization, multithreading, and DB query tuning.

THINKING HUT IT SOLUTIONS, PUNE | SOFTWARE ENGINEER

July 2018 – July 2019 | Pune, India

- Crafted an **IoT-based smart logistics platform** using **Spring Boot microservices** and **MQTT**.
- Implemented **Redis caching**, reducing **DB query response time by 25%**.

IBM INDIA PVT. LTD. | SOFTWARE ENGINEER

August 2016 – September 2017 | Pune, India

- Built and deployed **API Gateway** and **Enterprise Service Bus (ESB)** solutions using **IBM API Connect** and **DataPower**; delivered **8+ reusable components**.
- Devised **production-grade solutions** adhering to **Agile practices** and **AWS compliance standards**.

SKILLS

PROGRAMMING

Java 17, 21 • Python 3.x

LIBRARIES/Frameworks

Spring boot 3.x • Hibernate • Spring Data • Spring Security • Flask • Django • Rest Api

DATABASES

Postgres • MongoDB • MySQL • SQL Server • Oracle

CLOUD

AWS (EC2, Lambda, SQS, SES, S3, DynamoDB, Route53, EKS, ECS, ECR) • GCP (GKE, Cloud Functions, Big Query, PubSub) • PCF

VISUALIZATION TOOLS

Tableau • Apache Superset

MQ

Apache Kafka • MQTT • IBM MQ • ActiveMQ

DEVOPS TOOLS

Git • Jenkins • Docker • Kubernetes • Ansible

EDUCATION

B.E. (ELECTRONICS & TELECOMMUNICATION)

G. H. RAISONI COLLEGE OF ENGINEERING (AUTONOMOUS), NAGPUR

June 2012 - June 2016

Cum. GPA: 8.98 / 10.0

ACHIEVEMENTS

2023	Pioneer of Quarter (HSBC)
2022	Hackathon winner
2020	Employee of the quarter

PROJECTS

INCONTROL COMMERCIAL PLATFORM (MASTERCARD) | JAVA 21, SPRING BOOT 3.X, MICRO-SERVICES, DOCKER, JENKINS, AWS (ROUTE53, SQS, EKS, ECS, EC2, ECR), POSTGRES, ORACLE, KAFKA

- Contributed to **inControl**, a global **VCN/RCN provisioning and payment system**, enforcing issuer/card-level rules at **290+ TPS** across **millions of cards**.
- **Led migration of reporting modules** to a **cloud-native AWS solution** using **Lambda, S3, and API Gateway**, cutting report time by **35%**.
- **Automated GDPR workflows** via microservices and messaging, reducing SLA from **8h to 1h** with **100% automation**.
- Integrated with **10+ systems** via **REST APIs**, ensuring **high availability** and seamless cross-platform communication.
- Maintained **95% test coverage** using **JUnit, Mockito, and Postman**; enabled continuous deployment via **CI/CD pipelines**.
- Improved code quality and security by fixing **150+ issues** using **SonarQube, Checkmarx, and Fortify**, ensuring **DevSecOps compliance**.
- Designed **high-availability microservices** on **EKS**, boosting uptime and efficiency by **50%+**.
- Optimized DB and thread pools via **Dynatrace**, reducing **latency and failure rate by 90%+**.

CCR IMM CONTROLS INDUSTRIALIZATION (HSBC) | JAVA 17, SPRING BOOT, MICRO-SERVICES, DOCKER, ANSIBLE, GCP (GKE, BIG QUERY, PUBSUB), POSTGRES, TABLEAU, APACHE SUPERSET

- Automated **CCR IMM controls** (MPOR, MTM Variance, DM Code, BVAL Scores) to compute breaks and exceptions and streamline report delivery.
- Led **requirements gathering, design, estimation, and development of technical specifications**.
- Developed and **unit tested** features using **JUnit5 and Mockito**; improved test reliability and coverage.
- **Optimized low-performing workflows**, improving system efficiency by **29%**; deployed services with **25% faster release cycles**.
- Collaborated with **SMEs across 20 global locations** and 5 time zones to align on business and technical goals.

COSMOS (ORDER MANAGEMENT SYSTEM) | JAVA 8, SPRING BOOT, MICRO-SERVICES, MICROSOFT AZURE, SQL SERVER, ACTIVE MQ, APACHE KAFKA, IBM MQ, WEBLOGIC

- Developed a **microservices architecture** for the order management system, resulting in a **30% increase** in processing efficiency.
- Streamlined system performance, cutting **response time by 40%** and lowering **infrastructure costs by 67%**.

DATA ANALYSIS AND IOT FRAMEWORK DEVELOPMENT | SPRING BOOT, MICRO SERVICES, AWS, MICROSOFT AZURE, HADOOP, SPARK, HIVE, OOZIE, ANSIBLE, DOCKER, MONGODB, APACHE KAFKA, SERVERLESS DESIGNS

- Pioneered a cutting-edge micro-service ecosystem, delivering data-driven predictive insights and resolving complex business challenges. Achieved a 30% reduction in data latency compared to the previous system.
- Engineered an innovative IoT-based back-end, seamlessly integrating hardware data with cloud servers. Delivered data-driven predictive insights that led to a 20% reduction in system downtime.
